Victorian Cyber Security Showcase 2024

Fortifying Victorian Agencies for a More Secure Cyber Future

Tuesday, 23 July 2024
Pullman Melbourne Albert Park

Agenda at a Glance

As the Victorian Government begins to roll out further stages of their plan to tackle cyber security threats, they are implementing policies and strategies to ensure an uplift in security across the whole state. Like many other regions around the world, Victoria faces unique challenges and successes in the realm of cybersecurity for its government agencies.

One of the key challenges faced by Victorian Government Agencies is the constantly evolving nature of cyber threats. Hackers and cybercriminals continually devise new techniques to exploit vulnerabilities in government systems, making it crucial for agencies to stay vigilant and adapt their cybersecurity strategies accordingly. Additionally, the vast amount of sensitive data held by government agencies, including personal, financial, and confidential information, makes them attractive targets for cyber-attacks. The struggle to effectively protect this data while ensuring accessibility for government services is a constant challenge.

Continued efforts in strengthening cybersecurity practices and promoting a cyber-resilient culture will be crucial in securing the state's government agencies against emerging cyber threats. **Public Sector Network have partnered with the Victorian State Government and Cenitex to carefully curate a one-day agenda that addresses the community's biggest priorities.** Join us at the Victorian Cyber Security Showcase to hear from cybersecurity experts and industry leaders as they share best practices and foster collaboration.

Who You'll Meet

This series is designed for professionals involved in:

- Cyber Security
- Cyber Governance
- Cyber Policy
- Cyber Engagement
- Cyber Compliance
- Information Management
- Information Privacy
- Digital Security
- Risk Management
- Resilience
- Audit

Benefits of Attending

Learn about the state government's latest efforts to collaborate with industry to better protect citizens

Gain insight from respected leaders about their recent experiences securing networks and protecting data

Discover how new policies will help uplift the state of Victoria as a whole

Participate in interactive sessions about latest advancements in cyber risk mitigation

Hear from experts about the challenges facing the industry and how they are addressing them

Key Themes for 2024

- Government collaborating with industry to uplift cyber security

- Develop cyber resilience in a whole of state approach

- The latest policies to protect critical systems and infrastructure

- Balancing accessibility with security

- Learn from other leaders how to improve cyber security practices in their own departments and agencies

Your Inspiring Speakers

Dovid Clarke

Victorian Government Chief Information Security Officer and Executive Director, Data and Digital Resilience

Department of Government Services

Shane Moffitt

Victorian Government Deputy Chief Information Security Officer

Victorian Government
